Art Unit: 3634

1. Claim 5 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 5, line 1 "said retainer plate" should be -- said mounting plate--.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brooks '462.

See Figure 1 of Brooks, which shows a single ball holder. The fact that the shape of the second bends, A and D, of Brooks are L-shaped rather than U-shaped is considered to be a matter of choice and design.

4. Claims 1, 2, 4, and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Brooks '462 in view of Knable 6,601,711.

It would have been obvious to substitute a single mounting bracket for the pair of mounting brackets on Brooks '462(Fig.1), as taught by Knable '711.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Brooks '462 in view of Knable '711 as applied to claim 1 above, and further in view of Smith '460.

To substitute a metal strap with a tensioning buckle for the straps of Knable '711 is considered to be well within the purview of one with ordinary skill in this art, especially in view of the teachings of Smith '460.

6. Claims 6-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

7. The patents to Patton, Kailey, Shaftner et al., Medina, Richter, Hobson, McEwen, and Lombardi are cited to show similar structures.
